Advanced Venipuncture and I.V Arm

Item No.	Product Name	Intradermal injection	Product configuration
HJ1076	Right arm	—	Right arm
HJ1081	Full-Featured	✓	Left Arm

HJ1081

Skills:

- Intravenous injection
- Intramuscular injection
- Subcutaneous injection

Product Features:

- Adult left arm with cephalic vein, basilic vein, median cubital vein, median elbow vein, dorsal venous rete of hand obvious anatomical mark, easy to operate.
- Made from high polymer material, environmentally friendly.
- Intravenous injection: Support different puncture needles for training, obvious feeling and blood back streaming if correctly puncture and can do the transfusion practice, etc.
- Intramuscular injection part: Deltoid muscle.
- Subcutaneous injection part: Edge of deltoid muscle.

Infant CPR Manikin

Item No.:EH1013

Skills:

- CPR

Product Features:

- Six months infant body with obvious anatomical mark, easy to operate.
- Made from high polymer material, environmentally friendly.
- CPR:
 - * Supine position, head can hypsokinesis to clear the foreign matter in airway.
 - * External chest compression is available.
 - * Airway can be open.
 - * Various ventilation modes such as mouth to mouth, simply respirator and ventilator, etc. Valid artificial respiration can show thorax fluctuating.
- Umbilical cord: excision, ligation and nursing.
- Umbilical artery cannula and dose, can extract simulative blood if correctly operation.
- Can touch umbilical cord pulsing.
- Intravenous injection: support different puncture needles for training, obvious feeling and blood backstreaming if correctly puncture and can do the transfusion training, etc.
- Vessel, skin, tibia and intravenous injection arm can be replaced.

Nursing Manikin—Anna

Item No.: HJ1017

Skills:

- Breast nursing
- Gastric lavage
- Nasal feeding
- Catheterization
- Hair nursing
- Tracheotomy postoperative care
- Other basic nursing operation

Product Features:

- Whole adult female body with flexible joint for various body posture.
- Made from high polymer material, environmentally friendly.
- Nasal feeding: simulative gastric fluid can be extracted if correctly inserting stomach tube.
- Gastric lavage: Life size transparent stomach, can operate through mouth and nose by gastric lavage apparatus and stomach tube.
- Catheterization: Indwelling catheter and bladder irrigation are interchangeable for male and female, simulative urine will outflow after successful catheterization.
- Train oral nursing.
- Intramuscular injection: Equipped intramuscular injection modules on the left and right upper arm, can inject real liquid and can be dismantled to wash, easy to replace.
- Subcutaneous injection: Train different part injection, such as abdomen insulin and upper arm deltoid, etc.
- Enema: Support real clysis methods.
- Intravenous injection, Intramuscular injection and hypodermic injection modules can be replaced.

NOVIDADE

OB-GYN

Advanced Birthing Simulator

Item No.: FL1048

Skills:

- Vagina delivery, obstetric forceps/ vacuum extractor of fetal head
- Episiotomy and episiorrhaphy
- Prenatal examination
- Observing cervix vagina changing and fetal head falling position during the whole birthing process.

Product Features:

- **Delivery Model:** Soft and elastic perineum, can simulate accouche and training perineum nursing; abdomen is composed of transparent abdominal wall and emulational skin, easy to observe delivery function and demonstrate the relationship between fetal head and ischial spine.
- **Fetal Model:** Standard fetal with soft skin, umbilical cord and placenta, can distinguish fontanel and train vacuum extractor of fetal head.
- **Cervix Examination Model:** The position relationship between fetal head and ischial spine, cervix expansion degree, cervix changing process.
 - * Stage 1: No expansion on cervix, No disappear on cervical canal, position relationship between fetal head and ischial spine is -5.
 - * Stage 2: Expansion 2cm on cervix, cervical canal disappear 50%, position relationship between fetal head and ischial spine is -4.
 - * Stage 3: Expansion 4cm on cervix, cervical canal disappear completely, position relationship between fetal head and ischial spine is -3.
 - * Stage 4: Expansion 5cm on cervix, cervical canal disappear completely, position relationship between fetal head and ischial spine is 0.
 - * Stage 5: Expansion 7cm on cervix, cervical canal disappear completely, position relationship between fetal head and ischial spine is +2.
 - * Stage 6: Expansion 10cm on cervix, cervical canal disappear completely, position relationship between fetal head and ischial spine is +5.
- **Episiotomy and Episiorrhaphy Model:** Support three types of incision Episiorrhaphy training: middle incision, left incision and right incision.

Código e Descrição:

- **FL1048** - Simulador avançado de parto - completo
